**We are a business partner of well - known European manufacturers of drives and control...**

Since 2018, DEMERO has been developing and building multi-axis linear robots for a wide range of industrial applications. We increase production efficiency and automate production systems thanks to modern technological solutions

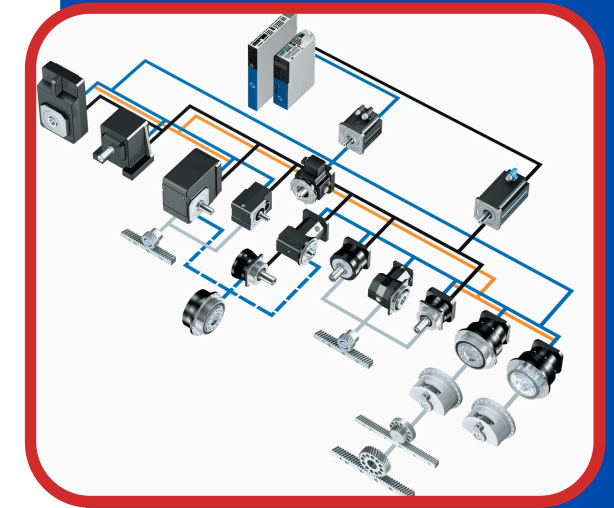

## ABOUT US

We are redefining automation standards by collaborating with European leaders in the drive technology industry. Through our global partnerships, we offer innovative, integrated drive solutions that enhance efficiency and precision. By utilizing cutting-edge technology, we help our clients stay ahead of the competition, saving time, reducing costs, and setting new performance standards.

## WHAT ARE WE SELLING?

- servo drives,
- servo motors,
- geared motors,
- servo geared motors,
- gears: planetary, bevel, worm, hypoid, stepless,
- angular multi-shaft gears,
- electric motors with encoders, fans, brakes,
- vector inverters,
- electric actuators,
- couplings: bellows, slotted, claw couplings, overload couplings, magnetic, safety, Oldham couplings,
- linear drives and guides: helical, belt, rack, anti-corrosion, explosion-proof, cleanroom,
- screw and chain jacks,
- brakes,
- cables and other drive accessories,
- special, stainless steel versions.

## WHAT DO WE OFFER?

- comprehensive drive solutions,
- technical consultancy,
- assistance in the selection of drives,
- assistance in programming and commissioning drives,
- service support,
- express deliveries,
- training in servo drive and inverter programming,
- models of 3D/2D drives,
- designs of multi-axis linear drive systems,
- Cartesian robot designs,
- Pick&Place manipulator designs.
